

PALE ALE

5.5% ABV | 52 IBU

Somewhere, deep in some remote forest, drops of piney purple sap drip from trees bearing some kind of unique and never seen before fruit. Not having tasted such a fruit, we set out to brew a beer inspired by its peculiar purple piney-ness. We imagined biting through supple purpureus skin, exposing juicy hazy golden flesh, and instantly experiencing pungent citrus, pine, and passionfruit represented by mounds of sticky Simcoe hops. Metaphorically, heaps of Strata hops peek through the pines with hints of ripened berries and plump buds of cannabis. Imagine with us!
