Check out our latest video on how to use our NEW digital suggestion platform, "Vetter". Shoutout to Mike Maddrey, Forklift Operator, for assisting with the video!

Jim Challender, Delivery Services Manager -

Jim worked a double shift to cover a Supervisor and Router who were out of the office. Instead of trying to move around other Supervisor's schedules, Jim took it upon himself to just "take care of it." Jim is a true team player

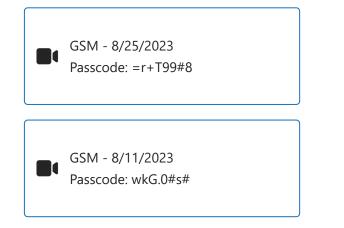

Lisa Baker, Payroll Assistant - Lisa worked with Christina in Ops to streamline and have full transparency with payroll of order selector incentive pay.

Charles Stillwagon, Delivery Driver - Charles offered his help to ensure another driver arrived at his safetysensitive accounts on time. He assisted another driver after completing his own assignment and volunteered to shuttle a truck from the mechanic after finishing his run to help a co-worker.

Tim Dougherty, Warehouse Manager - Tim volunteered to move to night shift for a week to help test and improve our truck loading during that shift. Tim has also volunteered to work all holidays and additional Sunday shifts to ensure we can deliver during the busiest times of the year.

Vetter Suggestion - GSM Recordings

On August 11th, an idea was submitted to record GSMs so that anyone who is absent would still have access to the meeting. You asked and we listened! From now on, all GSM meetings will be recorded & the links will be provided here.

volunteered to move to night shift for a week to help test and improve our truck loading during that shift. Tim has also volunteered to work all holidays and additional Sunday shifts to ensure we can deliver during the busiest times of the year.

Now through September 8th - we are collecting new or gently used clothing and bedding items for the AC Rescue Mission. Bins can be found in the drive-thru or Operations office. Once donated, you can enter to win some awesome prizes!

Sales Department

eoStar 23.6.5 Updates:

- A new order cutoff schedule, instead of a static time for retailers, will better support our Sunday order schedule.
- In eoTouch, salespeople can now easily see what pending orders an account has by simply opening the account screen; also the software automatically downloads the order details when the account screen is opened; no need to redownload to see new orders.
- eoMarket reminder emails that can be sent to select customers to ensure they submit their orders on time.e

Operations Department

eoStar 23.6.5 - Updates:

- An updated eoWarehouse QC function to streamline Quality Control checks of picked pallets.
- New employee permission controls to make sure all pickers are using the Voice functions of eoPick. Also, with eoPick, a new voice confirmation for pallet handoffs - this eliminates the need for scanning equipment.

Finance/IT Department

eoStar 23.6.5 - Updates:

On August 5th we upgraded eoStar to the latest release, Version 23.6.5. While we do upgrades to fix issues with the software, like correcting eoWarehouse printing, or a new voice module in eoPick Voice Picking, this release also had some **significant new features in our various departments.**

• Support for VIP's RPC (Retail Price Communication) Software that will streamline the creation of the monthly CPL. This software will also benefit Sales for accounts that require pricing documents be filled out.
